

# ECCOgravel

## Strong, frost-resistant gravel grid in HDPE

Creating a functional and stable gravel surface which is perfectly water permeable

### INFO

- + Frost-resistant gravel grid in **HDPE** with high compressive strength and impact value
- + Increased resistance against torsional loads due to **plastic reinforcements** between cells
- + A durable polyester geotextile which is fully bonded to the honeycomb grid, preventing gravel shift and rutting
- + Foldable sheets make for easy transportation, with large dimensions allowing fast installation
- + ECCOgravel creates a stable surface for walking, cycling and driving

### TECHNICAL SPECIFICATIONS

- + DIMENSIONS 160 x 120 cm (Foldable for storage and transport)
- + AVAILABLE IN THREE HEIGHT SIZES: 20, 30 and 40 cm
- + MATERIAL HONEYCOMB 100% HDPE - high-density polyethylene
- + COLOUR white, grey or black

### APPLICATIONS

- + Driveways and parking areas
- + Fire roads
- + Garden and foot paths
- + Terraces and patio spaces
